

# Installation guide F-Secure 2016

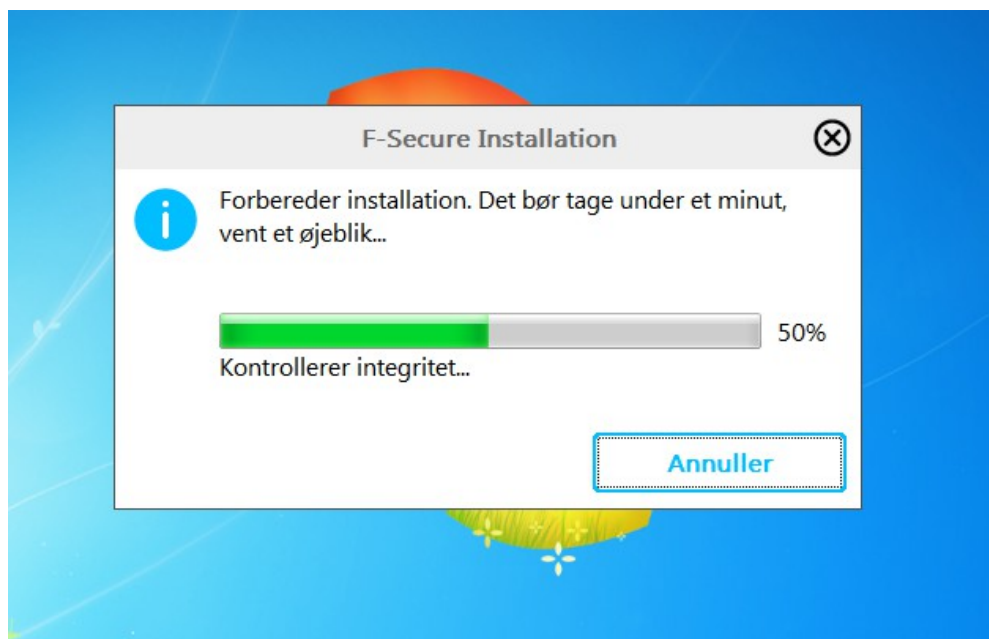

Tryk på linket i deres mail der vil download og vælg køre for at starte program installation.

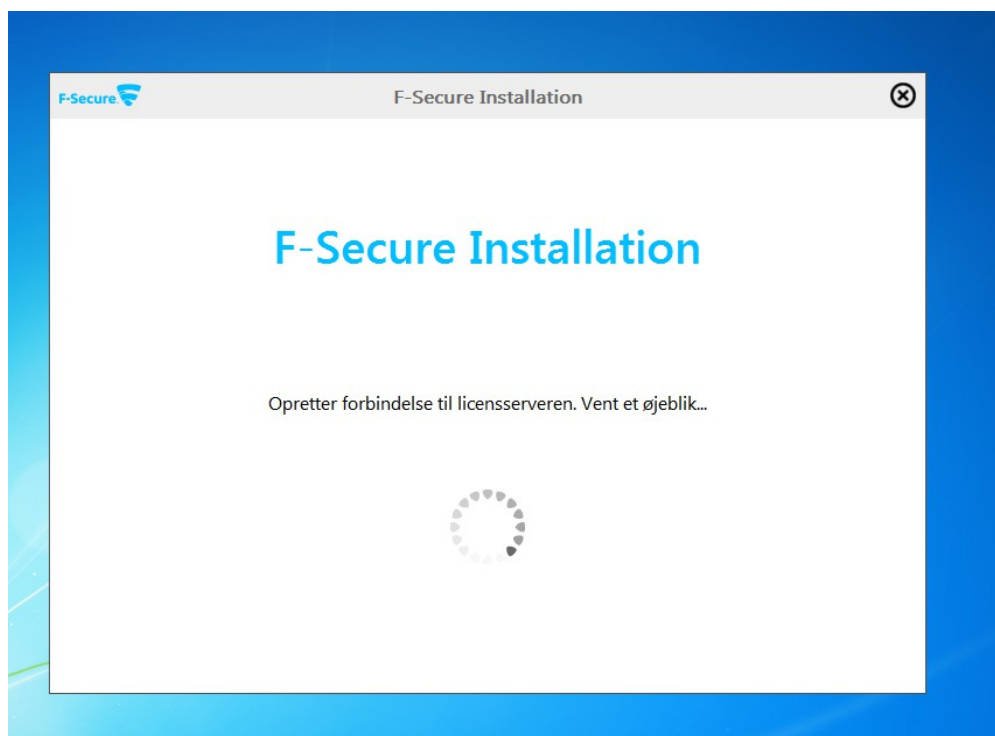

Ved kørsel af program vil du få en pop op der spørger om lov til at køre dette program – Tryk Ja/Yes

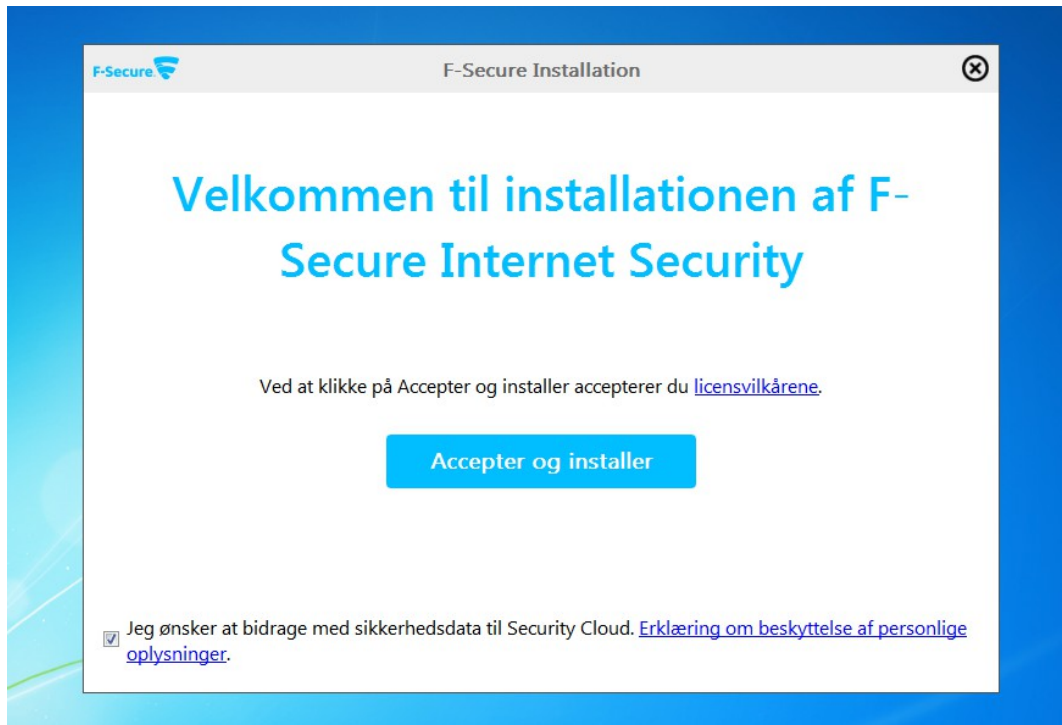

F-secure vil forberede installationen af software. Dette vil tag et kort øjeblik.

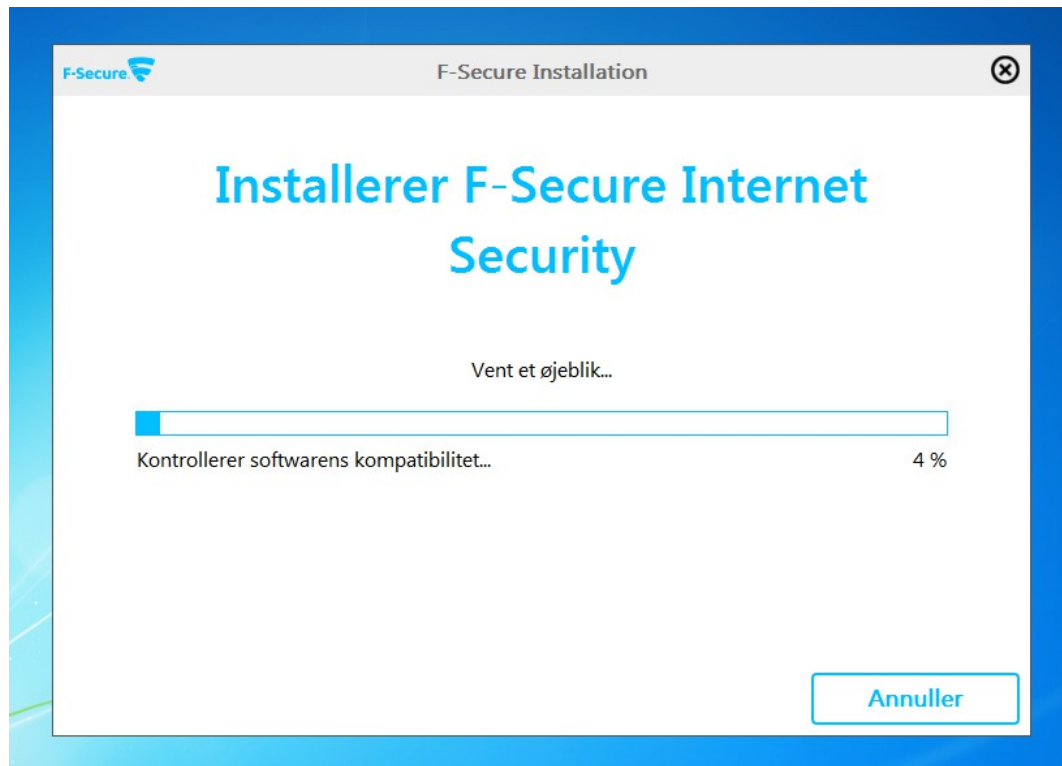

Forbinder og kontrollere licensen.

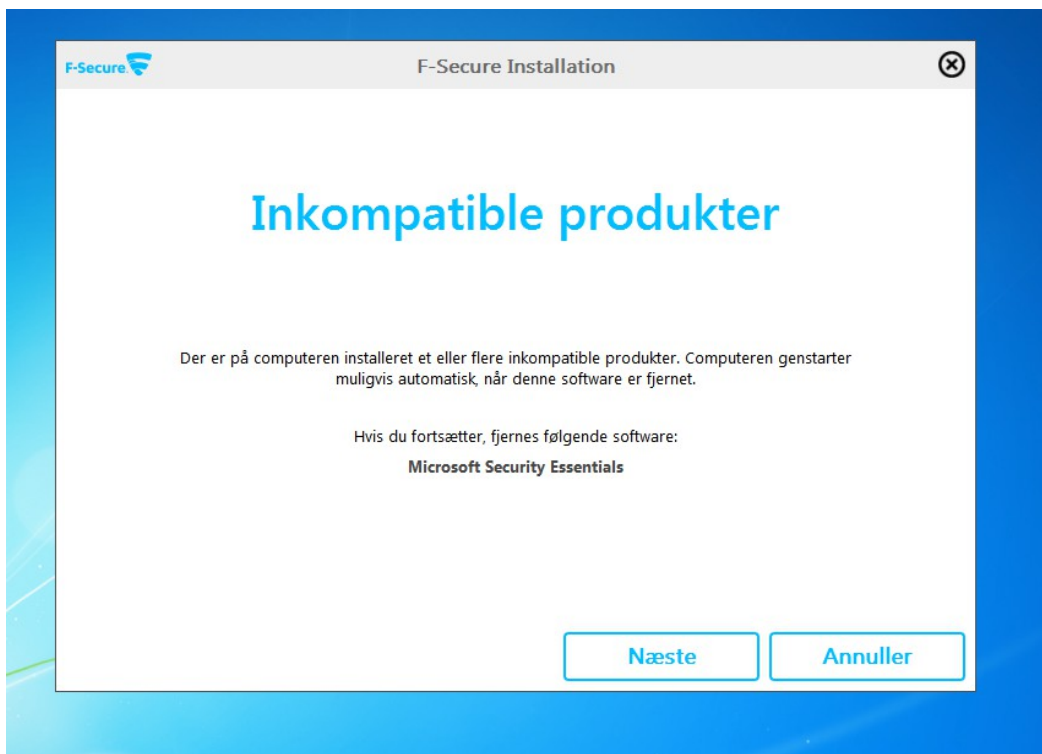

Du skal acceptere licensvilkårene – Husk at læse disse.

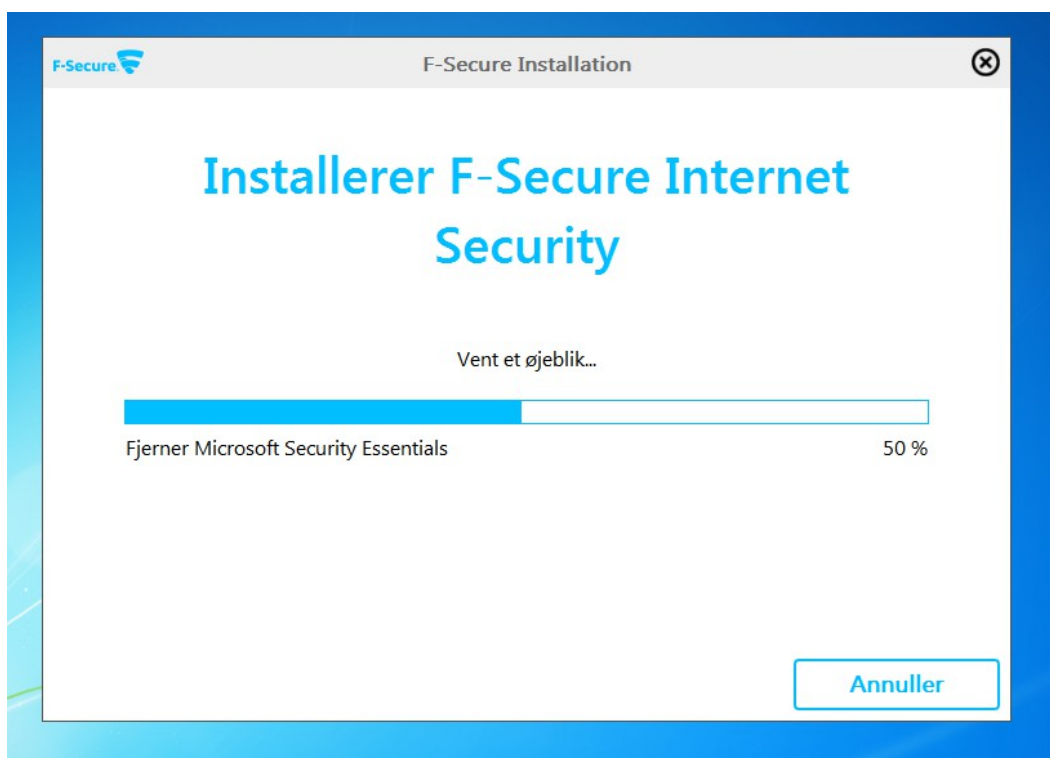

Installation starter.

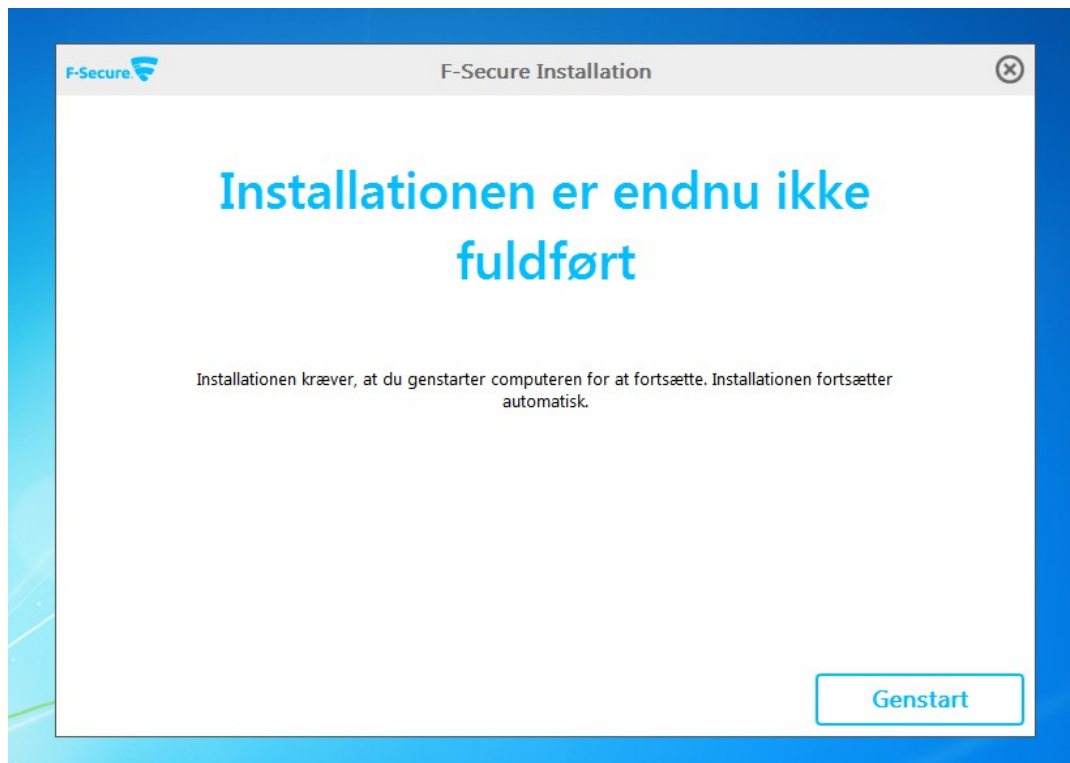

Hvis du har installeret andet antivirus eller Microsoft Security Essentials, vil dette vindue vises. Tryk Næste for at fjerne produkt

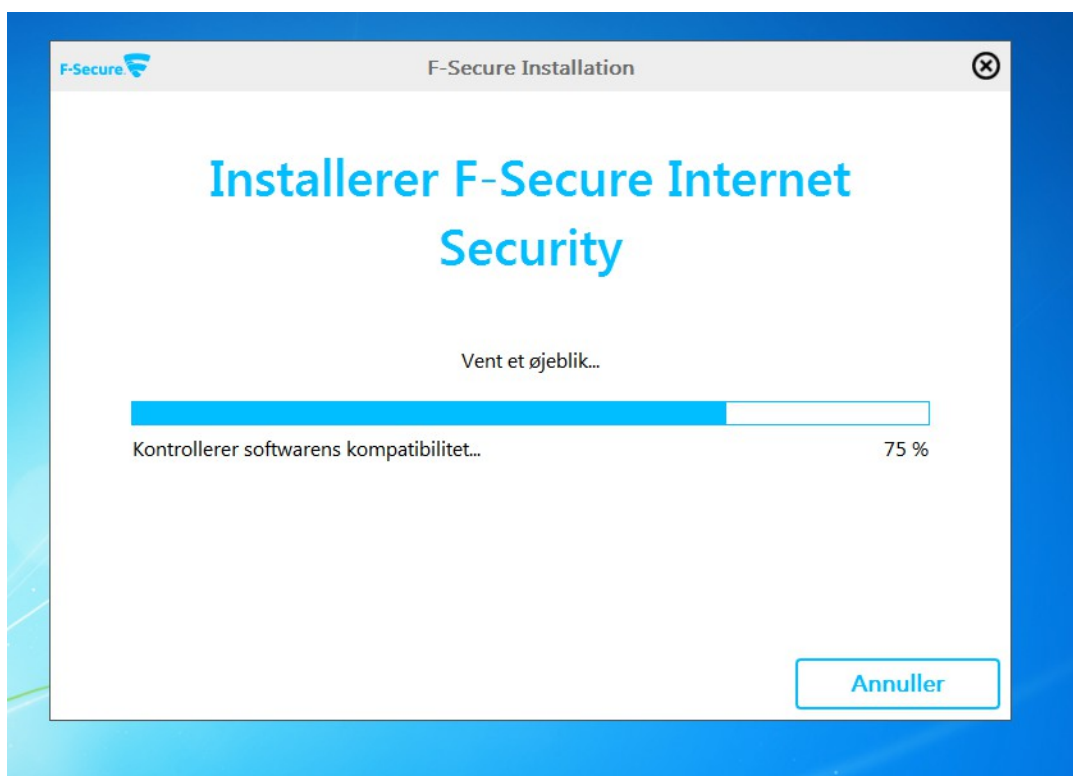

F-secure vil automatisk fjerne inkompatible produkter. Her er det Microsoft Security Essentials.

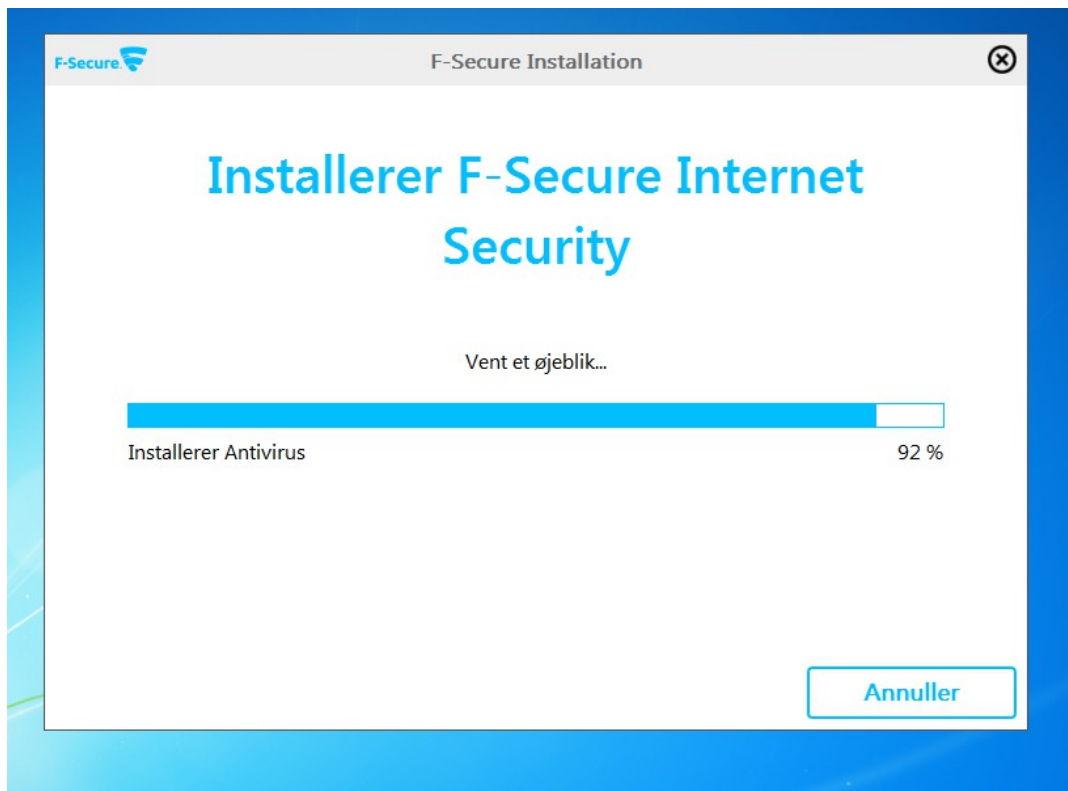

Efter fjernelse af inkompatible produkter vil maskine genstarte.

Når windows er klar igen forsætter installationen.

## Installere F-secure antivirus

Når installation er færdig vises dette billede. F-Secure vil nu opdatere sine virus definitioner. Når F-Secure er opdateret lave en virus scanning
